DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 198-207 and 214, drawn to a method of treating depression in a subject comprising administering a MCH1 antagonist, classified in class 514, subclass 2.
 - II. Claims 208-213, drawn to a method of treating anxiety depression in a subject comprising administering a MCH1 antagonist, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related in that they are both methods of treatment comprising administration of an antagonist to MCH1, however, depression and anxiety are two separate and distinct diseases that are diagnostically classified as separate diseases that have different diagnostic criteria as designated by the DSM (Diagnostic and Statistical Manual of Mental Disorders), and therefore methods of treatment are patently distinct.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1646

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
